The Bounty Program – available also for Newbies! – is all-embracing, including Translations and Moderation, Signature and Avatar, Blog and Media, Twitter, Facebook and Vkontakte campaigns available (and even custom campaigns are allowed).
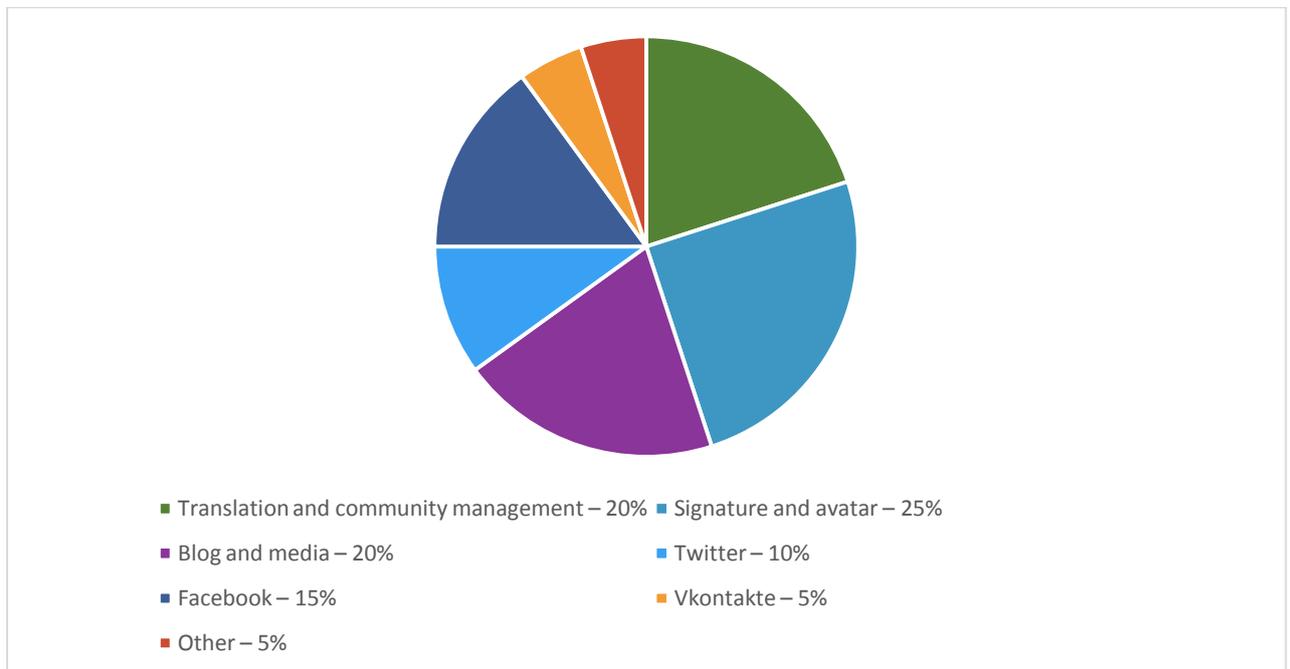

The total Bounty Pool is 5% or 2,500,000 STAT tokens in the most favorable outcome, but it solely depends on the ICO outcome: The more tokens are sold, the bigger your bounties will be! So...

Guys, please help us spread the word and build the strong community!

The Startima total bounty pool will be divided as follows:

- Blog and media – 20%
- Twitter – 10%
- Facebook – 15%

Only once these steps are completed and you received a confirmation from us may you start working on your activity.

Rules

- Once you've posted the ANN translation in your language as a post opening a new local thread on Bitcointalk and other forums, post links to the posts to this bounty thread (either one by one, or all in one post if you've posted all at once). Then we will be checking the corresponding threads on a regular basis to make sure your activity in moderation / community management suits your task's requirements.

- Translation must be original. Using Google Translate or any other machine (including online) translation tools is not allowed. Participants exploiting those will be disqualified.
- Any translation activity must include the following disclaimer in the language of the translation (just pick either "WhitePaper" or "Announcement" (or both) depending on your activity reserved) placed at the top of the translation of the white paper and at the bottom of the translation of the announcement (you'll also need add the date when you are publishing your translation and keep the links to the white paper and the announcement): "This document is a translation of Startima original English language White Paper / Announcement, which is the official source of information about the Startima Token Launch. The translation was kindly made and published on [DATE] by a respected Startima ambassador. However, there is a tiny chance that in the course of the translation some of the information contained in the original document may have been lost, corrupted, misrepresented, or just sound different. The 100% accuracy of the translation cannot be guaranteed. In the event of any conflicts or inconsistencies between this translation and the official English language WhitePaper / Announcement, the provisions of the English language original shall prevail."

- Moderation is required within the framework of each task option and must be performed in an active manner till the end of the campaign. Inactive participants will be replaced by another moderator hired specifically for updating and moderating your thread. A single-post dead thread is totally useless for the project and will not be tolerated. We expect from translators to take the responsibility of moderation of their threads by keeping the thread active by means of publishing the translation of official announcements, news, and updates on a regular basis. We will disqualify an inactive translator that just translated a thread and left that dead, and we will reduce the reward for such a translator by 50%.
- You may answer questions from potential buyers without asking for advice in the #bounty channel on Startima Slack if you know the answer and it has previously been published by the Startima staff in the main discussion thread on:
